ELECTION, TUESDAY, NOV. 2, 1892.
FOR PRESIDENT.
WINFIELD SCOTT.
FOR VICE PRESIDENT.
WILLIAM A. GRAHAM
OF NORTH CAROLINA.

For Presidential Electors.
DANIEL S. HULL, of Iowa.
LYNDEN CUTLER, of Iowa.
ANDREW J. CROOK, of Iowa.
JOHN B. MARLOW, of Iowa.
JOHN B. MARLOW, of Iowa.
JOHN B. MARLOW, of Iowa.
WILLIAM AYER.

City and Mechanical Improvements.

There is great activity at the present time in this city in pushing forward improvements in its driving mechanical pursuits. Among these may be mentioned the active operations on the Gas works. This company which was formed but a few weeks since, has already constructed a beautiful row of brick buildings in the valley near Donnell's Cove, and a Gasometer capable of containing between twenty and thirty thousand cubic feet of gas. The chimney now in progress of construction, is to be eighty feet in height, is of circular form and will be ornamental. The workmen are also busy engaged in laying down the main pipes through the streets of the city. All these operations are pushed forward with great activity and in a few weeks our city will be handsomely illuminated with gas, many of the stores and other buildings having been fitted up for the reception of the gas as soon as the mains are supplied.

The Gaslight Fixture Company have an establishment on West Market Square, where they are very actively employed in placing all the necessary fixtures to the various buildings in the city.

In the same valley with the Gas Company works is the well known and extensive brickyard of Mr. J. Heller. He has recently added to his works a steam engine and a new and powerful machine for pressing bricks out of powdered clay, slightly moistened by exhaust steam. This machine has been constructed by Messrs. Huxley & Egory, at their Machine works in this city. It is capable of turning out between thirty and fifty well made and very smooth, hard and beautiful bricks in a minute. It is a very efficient brick-maker, but has not yet become a voter. By this improvement Mr. Heller will be able to turn out an average quantity of bricks in a year, a result well due to his enterprise, his skill and his industry.

In this same valley Messrs. Bates & Whittier have a large Iron Foundry, of ample dimensions and most convenient structure, where they manufacture all manner of castings and an incredible number of tools and parts, stores of their own designing and invention. Their Franklin stoves are very much admired by those who like an open fire and yet an economical and a safe one.

This Valley of Industry was famous thirty or forty years since for its activities in the tanning, currying and shoe-making business, but for a number of years has lain dormant except in the brick-making business. But the ancient spirit has returned, and with the modern improvements of machinery, and produces results which far outvalue its former life.

The Catholic Church, now building on Union street, is in a state of rapid progress. Workmen are now engaged in putting on the roof, and the tower and steeple is daily creeping skyward. This will be a noble structure, and an ornament to our city. Its position is commanding, its size ample, its proportions attractive, and the whole finish is to be elegant and harmonious. It will far surpass any church structure in the city. Mr. James Kirby is the contractor, and he is doing his work most faithfully and acceptably.

Opposite to this church, Mr. Wm. Lewis has erected a very neat dwelling house, of graceful form, good architectural proportions and handsome finish and has otherwise improved his valuable real estate in that section of the city.

The basement of the Central Church, on French street, is nearly finished and in a few days the frame of the church, with a steeple and spire, will be raised. Mr. Leonard L. Morse is the contractor, and under his direction nothing goes amiss or delayed.

We notice also that the foundation is being laid for a beautiful Vestry Room, for the Baptist Church, fronting on the Baxter Common. It has been stated to us, that this building is the gift of two citizens, who have been prospered in their business. It is a noble gift and should awaken the thought of similar enterprises of benevolence in other quarters.

The proprietor of the Franklin House, Wm. McLaughlin, Esq., has added another enterprising story to his house and given it a modern finish, adding very much to the accommodations and to the beauty of the building.

The City are engaged in the erection of a High School House on the Bruce Lot, on Hallow street. This is a noble structure. The work has been done by the day, under the superintendence of Mr. O. P. Suttle, and every well has been driven in reference to having a good house. It will prove a very useful and satisfactory addition to our city.

We have noticed, with great pleasure the erection of a large building near Meadow Brook, on Centre street, in the immediate vicinity of

Mr. Stevens' large Wool Building Factory, designed for the manufacture of broadcloths. This is a branch of business long required here and which we think cannot but be successful.

Nothing in the way of public improvements, affords us more pleasure than to notice the increase of manufacturing establishments in our city. They are self-supporting and tend to increase the business, value and character of this city.

We cannot well refrain from noticing again, the progress made in the erection of a new and dwelling on Broadway, by E. J. Peck, Esq. The location is beautiful and the house will be one of the most ample and elegant residences in our city.

We have run through with some of the public and most prominent improvements in the city. If addition we ought to state that there have been a large number of dwellings, stores and other buildings erected in the present season—some of them very fine houses, as, for example, the one on Court street. There have been many more repairs than usual put upon the houses in the city, and much greater attention than in former years, upon fences and the improvement of grounds.

On the whole, the city is improving in an active, healthy growth and is rapidly increasing in prosperity. With the opening of the Railroad, which will soon come, the city will be given to the business activities of the city, and her prosperity will be assured.

A good opportunity will be afforded to those who wish to obtain a piece of property, as Nathaniel Hawley, Esq., proposes to change his nursery of fruit trees, and will take up all the trees in his present nursery and will dispose of such as may be wanted, at low prices. Mr. Hawley has taken great pains to obtain all the best varieties of apple grown in the country, and has the largest fruit-growing orchard and nursery of fruit trees in the city. The fruit of these trees is of excellent quality, and some of them are of the highest quality. The trees are of various kinds, including the following:—

Apple—Red, White, Green, Yellow, and Black. Some of the best varieties are the following:—

Apple—Red, White, Green, Yellow, and Black. Some of the best varieties are the following:—

Apple—Red, White, Green, Yellow, and Black. Some of the best varieties are the following:—

Apple—Red, White, Green, Yellow, and Black. Some of the best varieties are the following:—

Apple—Red, White, Green, Yellow, and Black. Some of the best varieties are the following:—
